

Management Control System Ship Repair Yards

1 Better sales

Kaizit is an effective sales system that utilizes vessel information in order to find new business potential, and secures an effective sales process.

2 Superior Customer Care

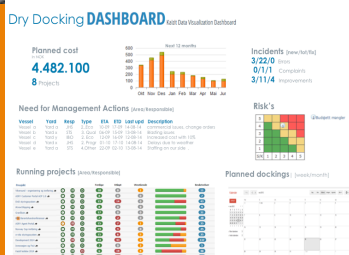

By implementing a standard workflow you will keep track of critical activities and provide superior customer services.

3 Improved Quality

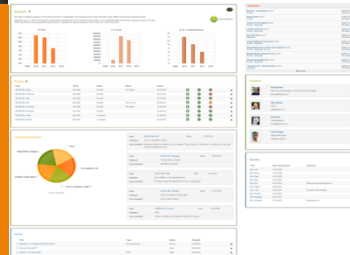

The management is provided with updated business information and a transparent view of all repair projects.

Kaizit is a specialized system that is developed in partnership with a leading international ship repair yard. The system is provided at a cost effective subscription model.
